DSWEB
YOUR ENVIRONMENTAL DATA ON LINE

Seveno DSWeb provides secure web browser access to your DataSight Enterprise environmental databases.

Pre-configured graphs for up-to-the-minute reporting

Tabular and graphical views

Integration with Google Maps

Data entry & file upload

Data export

News and report links

View and upload documents

Multi-level access security

Automate your data retrieval and reporting

DataSight ENTERPRISE

DataSight Enterprise provides automated data import capability, an advanced report designer, plus automated, scheduled report publishing. All combine to create rapid and efficient presentation of your environmental monitoring data.

Seveno DSWEB

Deliver up-to-the-minute environmental data and latest reports via standard web browsers. With direct access to your environmental database, you set the specific data visibility for all stakeholders.

Seveno DSWeb

EXTEND DATASIGHT ENTERPRISE

Connect DSWeb to multiple DataSight Enterprise databases and present this data online via common web browsers.

OVERVIEW GRAPHS

Configure pre-defined graphs for rapid 'overview' viewing of latest data. These will usually relate to stations and variables that users wish to see when they log in.

'Last value' information is also shown.

GOOGLE MAPS

View monitoring site locations in a Google Map panel or pop-up browser window. The map pin pop-up properties include a link back to station data.

NEWS AND REPORTING

Keep your users, management and other stakeholders up-to-date with your latest project announcements and reports.

- Individual news items and pub-lish date, with titles below the data tree for visibility and quick access
- Link to documents, such as latest automated reports from DataSight

GRAPHICAL AND TABULAR VIEWS

Monitoring variables are available for viewing in both tabular and graphical formats.

- Select a pre-set time period or enter a desired date range
- Export data to the local PC

DOCUMENTS

DSWeb provides online access to documents stored in the DataSight database and related to specific sites or data categories. These might be photographs, raw data files, service manuals, etc.

DATA IMPORT

DSWeb provides the ability to add data to your database via manual data entry or data file upload.

ADMINISTRATION

The DSWeb administrator controls aspects of the site appearance, data security and multi-level user access to specific data. The administrator controls:

- Database, station and variable publishing
- Individual user permissions to access specific databases, sta-tions, variables, flagged data records and news/report items
- Pre-configured overview graphs
- Permissions to upload data

MINIMUM REQUIREMENTS

- DataSight Enterprise
- Microsoft SQL Server 2005 or later
- An IIS web server with Windows Server and Microsoft .NET Framework 4.0
- Google Maps API key
